

Android update Sonim XP7700

From April 2022 GroupTalk can no longer support Android versions older than 5.0. Please see the guideline below how to upgrade your Sonim XP7700 to android 5.0.

Please use these steps to update your XP7 phone to the final build

1. Open Settings > Security > and temporarily turn on Unknown Sources (turn this back off when complete)
2. Use this link to obtain the updater and open it directly on the phone to update: https://drive.google.com/file/d/1ZY1LkzAttK3yKbIBKUPSoV_bczAfOB9B/view
3. Follow the on-screen prompts to allow the update to proceed
4. You may see your screen flash, phone reboot, or other events while the update is running; this is normal
5. Once complete you can open Settings > About Phone > to ensure you see an Android OS 5.1.1 to confirm the update
