

A close-up photograph of a woman wearing a yellow hard hat and a high-visibility safety vest with reflective yellow and orange stripes. She is smiling and looking upwards and to the right. She is holding a tablet computer in front of her. The background is a blurred industrial or construction site.

# Push to Talk

**We have the solution for your needs,  
group talk by a push of a button**

**Business critical PTT since 2006**

# GroupTalk

## HOW IT WORKS

With a simple push of a button, staff have access to real-time group communication without range limitation.

Press the alarm button to immediately alert colleagues when you need help. Alerts with real-time GPS location tracking.

Effectively coordinate your mobile workforce with Command and Control, using PC Dispatch.

Use your existing Smartphones, Android or iOS, for a professional Push to Talk service.

- ✔ GroupTalk is a cloud based service for easy and cost effective setup and maintenance. GroupTalk use mobile and WiFi networks for global coverage.
- ✔ Web-based administration of users and features. Smartphones users install the GroupTalk app and are ready to go in minutes!
- ✔ Prior investments in traditional two way radio networks (analog/DMR/Tetra) can be used in combination with GroupTalk. Expand your two way radio communications to include smartphone users.

 **EASY**

Manage the service centrally, get up and running in minutes

 **RELIABLE**

Multi channel two way radio and personal alarm via mobile or WiFi network

 **SECURE**

SSL and AES 256 bit encryption is used for voice and data communication for your privacy

 **COST EFFECTIVE**

Use existing smartphones with annual-, monthly-, or daily licenses to control cost

 **MODERN**

Professional cloud service with central administration. Easy to use mobile app with crystal clear voice
