# Push to Talk

**We have the solution for your needs,  
group talk by a push of a button**

**Business critical PTT since 2006**

# GroupTalk

## HOW IT WORKS

With a simple push of a button, staff have access to real-time group communication without range limitation.

Press the alarm button to immediately alert colleagues when you need help. Alerts with real-time GPS location tracking.

Effectively coordinate your mobile workforce with Command and Control, using PC Dispatch.

Use your existing  
Smartphones, Android or  
iOS, for a professional  
Push to Talk service.

- ✓ GroupTalk is a cloud based service for easy and cost effective setup and maintenance. GroupTalk use mobile and WiFi networks for global coverage.
- ✓ Web-based administration of users and features. Smartphones users install the GroupTalk app and are ready to go in minutes!
- ✓ Prior investments in traditional two way radio networks (analog/DMR/Tetra) can be used in combination with GroupTalk. Expand your two way radio communications to include smartphone users.

### ✓ EASY

Manage the service centrally, get up and running in minutes

### ✓ RELIABLE

Multi channel two way radio and personal alarm via mobile or WiFi network

### ✓ SECURE

SSL and AES 256 bit encryption is used for voice and data communication for your privacy

### ✓ COST EFFECTIVE

Use existing smartphones with annual-, monthly-, or daily licenses to control cost

### ✓ MODERN

Professional cloud service with central administration. Easy to use mobile app with crystal clear voice
